

**DEPARTMENT OF ENVIRONMENTAL QUALITY
NOTICE OF PUBLIC MEETING AND PUBLIC COMMENT FOR A WATER
QUALITY STUDY (TOTAL MAXIMUM DAILY LOAD AND
IMPLEMENTATION PLAN DEVELOPMENT)**

The Department of Environmental Quality (DEQ) and the Department of Conservation and Recreation (DCR) seek written and oral comments from interested persons on the development of Total Maximum Daily Loads (TMDLs) and an Implementation Plan (IP) to address multiple impairments in the Nottoway River Basin and its tributaries. The affected streams were identified in Virginia's 1998 303(d) TMDL Priority List and Report and Virginia's 2002 303(d) Report on Impaired Waters as impaired due to violations of Virginia's water quality standards for fecal coliform bacteria. The streams are therefore not supporting the Primary Contact Recreation (swimmable) Designated Use. The impairments include: 17.76 miles of the Nottoway River, 9.85 miles of the Little Nottoway River, 10.35 miles of Big Hounds Creek and 7.17 miles of Beaverpond Creek. These impairments are located in Prince Edward, Nottoway, Lunenburg, and Dinwiddie Counties.

Section 303(d) of the Clean Water Act and §62.1-44.19:7.C of the Code of Virginia require DEQ to develop TMDLs for pollutants responsible for each impaired water contained in Virginia's 303(d) TMDL Priority List and Report. Section 62.1-44.19:7.A and Section 62.1-44.19:7.C of the Code of Virginia require the development of an IP for approved TMDLs. The IP should provide measurable goals and the date of expected achievement of water quality objectives. The IP should also include the corrective actions needed and their associated costs, benefits, and environmental impacts.

A public meeting on the development of the Nottoway River Basin TMDL and Implementation Plan will be held on **Wednesday, January 12, 2005, 7:00 p.m.** in the auditorium of the Southern Piedmont Agricultural Research and Extension Center, located at 2375 Darvills Road in Blackstone, VA. A map to the facilities can be found on the internet at <http://www.vt.edu>. The purpose of the meeting is to discuss the proposed reductions in fecal bacteria needed in the Nottoway River watershed and to solicit public participation for the IP development.

The public comment period for this phase of the TMDL development will end on February 11, 2005. A fact sheet on the development of the Nottoway River TMDL is available upon request or can be viewed on the DEQ website at <http://www.deq.virginia.gov/tmdl>. Questions or information requests should be addressed to Kelly Wills. Written comments should include the name, address, and telephone number of the person submitting the comments and should be sent to Kelly J. Wills, Department of Environmental Quality, 7705 Timberlake Road, Lynchburg, Virginia, 24502, telephone (434) 582-5120 ext. 6042, fax (434) 582-5125, or e-mail kjwills@deq.virginia.gov.
